LIGHT DUTY CANTILEVER PALLET RACKING

Easy accessibility to
with support along
length of the item
stored. available in
single sided and
double sided configuration
double sided rack provides
maximum storage capacity
on a single central aisle
while the single sided
is designed to fit
against a wall

ROLL POST RACKING

Designed for storing
long and easily
damaged materials
such as rods, piping
and beams. The
rack contains a
number of cradles,
each fitted with
ball-bearing wheels
running on rails,
allowing the
product to be easily
handled. Products
to be stored are
placed in the
cradles and then
easily moved in and
out of the storage
position

New Product

Dexion Keylock Workbenches are great for any Industrial,
Workshop or Home use,
where strength and durability are a must.
Made from the same components as the Dexion Pallet
Racking,
you have the satisfaction of knowing that you are getting the
same strength and versatility.

Customise your bench with the different accessories that are
available.
