

What do you mean by "above the shopping cart" ? The price and add to cart part of the product page ?

If it is, you have to edit the view "product / show_tabular", remove the code:

```
<li id="hikashop_show_tabular_specification_li" class="hikashop_tabs_li ui-corner-top"><?php echo JText::_('SPECIFICATIONS');?></li>
```

And move the code:

```
<div class="hikashop_tabs_content" id="hikashop_show_tabular_specification">
<?php
    //LAYOUT show_block_dimensions
    $this->setLayout('show_block_dimensions');
    echo $this->loadTemplate();
    if(!empty($this->fields)){
        //LAYOUT show_block_custom_main
        $this->setLayout('show_block_custom_main');
        echo $this->loadTemplate();
    }
?>
</div>
```

After:

```
<?php
if(!empty($this->element->extraData->rightBegin))
    echo implode("\r\n",$this->element->extraData->rightBegin);
?>
```
